07 PROJECT DOCUMENTATION

Project Title: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

7.1 Project Documentation

The Project Documentation phase records all the information related to the development, testing, implementation, and demonstration of the project. It provides a complete reference for understanding the automated IT procurement workflow developed in the ServiceNow platform.

7.2 Documentation Objectives

- Document the complete project workflow.
- Explain the ServiceNow implementation process.
- Record project requirements, design, development, and testing details.
- Maintain project files for future reference and evaluation.

7.3 Project Documents Included

- Brainstorming and Ideation Report.
- Requirement Analysis Report.
- Project Design Document.
- Project Planning Report.
- Project Development Report.
- Project Testing Report.
- Screenshots of the ServiceNow workflow.
- Flow Designer configuration details.

7.4 Workflow Documentation

The documented workflow includes the complete sequence of activities:

1. Employee submits a Standard Laptop Request.
2. ServiceNow creates a Request.
3. Flow Designer triggers automatically.
4. Manager reviews and approves the request.
5. Catalog Task is generated.
6. IT Support processes the request.
7. Laptop is allocated and the request is closed.

7.5 Screenshots Documentation

Screenshots were collected for each important stage of the project, including:

- Service Catalog Request Form.
- Flow Designer Workflow.
- Request Creation.
- Manager Approval.
- Catalog Task Creation.
- Completed Request Status.

7.6 Project Repository Documentation

All project documents, screenshots, and supporting files were organized phase-wise and maintained in a public GitHub repository according to the project submission guidelines.

7.7 Documentation Outcome

The project documentation provides a complete record of the automated IT procurement system, making it easy to understand, maintain, and demonstrate the project.

Conclusion

The Project Documentation phase ensures that every stage of the project is properly recorded and organized. It serves as the final reference for project evaluation, future improvements, and demonstration.
