08 PROJECT DEMONSTRATION

Project Title: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

8.1 Project Demonstration

The Project Demonstration phase presents the complete working model of the Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer project in the ServiceNow platform. It demonstrates how the automated workflow processes a laptop request from submission to completion.

8.2 Demonstration Objectives

- Demonstrate the complete automated IT procurement workflow.
- Show the Service Catalog laptop request process.
- Display the Flow Designer automation.
- Verify the manager approval process.
- Demonstrate automatic Catalog Task creation and request completion.

8.3 Demonstration Steps

1. Open the ServiceNow platform.
2. Navigate to the Service Catalog.
3. Submit a Standard Laptop Request.
4. Verify that the Request (REQ) is created.
5. Open Flow Designer and show the triggered workflow.
6. Approve the request as the manager.
7. Show the automatically generated Catalog Task.
8. Complete the task and verify that the request status changes to Closed Complete.

8.4 Demonstration Results

The demonstration successfully showed the complete automation process. The request was created, approved, assigned to the IT team through a Catalog Task, and completed without manual intervention.

8.5 Demo Video Link

8.6Project Outcome

The project successfully automated the standard laptop ordering process using ServiceNow Flow Designer, reducing manual work and improving the efficiency of IT procurement.

Conclusion

The Project Demonstration phase confirmed that the automated workflow functions correctly and meets the project objectives. The final demo video and screen recording clearly present the complete implementation and working of the project.
