06 PROJECT TESTING

Project Title: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

6.1 Project Testing

The Project Testing phase was carried out to verify that the automated IT procurement workflow functions correctly in the ServiceNow platform. Each stage of the workflow was tested to ensure accurate request processing, approval handling, catalog task creation, and request completion.

6.2 Testing Objectives

- Verify successful laptop request submission.
- Validate the Flow Designer trigger.
- Test the manager approval process.
- Verify automatic Catalog Task creation.
- Ensure request status updates correctly.

6.3 Testing Environment

Platform: ServiceNow

Module Used: Flow Designer, Service Catalog, Requests, Approvals, Catalog Tasks

Testing Type: Functional Testing and Workflow Testing

6.4 Test Cases

Test Case 1: Laptop Request Submission

- **Input:** Submit a Standard Laptop Request.
- **Expected Result:** Request (REQ) is created successfully.
- **Status:** Passed.

Test Case 2: Flow Trigger Validation

- **Input:** Submit a new request.
- **Expected Result:** Flow Designer starts automatically.
- **Status:** Passed.

Test Case 3: Manager Approval

- **Input:** Manager approves the request.
- **Expected Result:** Approval status changes to Approved.
- **Status:** Passed.

Test Case 4: Catalog Task Creation

- **Input:** Approved request.

- **Expected Result:** Catalog Task is generated automatically.
- **Status:** Passed.

Test Case 5: Request Completion

- **Input:** Catalog Task completed by IT team.
- **Expected Result:** Request status changes to Closed Complete.
- **Status:** Passed.

6.5 Testing Results

Testing Activity	Result
Laptop Request Creation	Passed
Flow Designer Execution	Passed
Manager Approval Workflow	Passed
Catalog Task Generation	Passed
Request Status Update	Passed

6.6 Bug Fixing

Minor workflow configuration issues were identified during testing and corrected. After fixing the configuration, the workflow executed successfully without errors.

6.7 Testing Outcome

The complete IT procurement workflow operated successfully from request submission to laptop allocation. All test cases passed, confirming that the automation works as expected.

Conclusion

The Project Testing phase confirmed that the automated laptop procurement workflow is reliable, accurate, and ready for deployment in the ServiceNow environment.
